

Individuale: Gli incontri si svolgono esclusivamente con chi porta la difficoltà. Sono incontri con cadenza settimanale della durata di circa un'ora. La richiesta della consulenza può essere unica ovvero il paziente può anche non continuare il percorso perché una seduta è stata sufficiente a offrirgli aiuto o perché vuole prendere del tempo e riflettere sull'utilità del percorso.

Il paziente, qualora avverta l'esigenza di continuare, potrà fissare un altro appuntamento e decidere di iniziare una psicoterapia.

Francis Bacon's work is characterized by its distorted and expressive style, often depicting figures with thick, fleshy features and a sense of movement. The figures are rendered with a strong sense of volume and a focus on the human form, often in a state of emotional intensity or physical strain. The use of color is vibrant and varied, contributing to the overall dynamic and somewhat chaotic atmosphere of his paintings. The figures are often depicted in a way that suggests a narrative or a specific moment in time, but the distortion of their features and the expressive brushwork create a sense of ambiguity and emotional depth. The figures are often shown in a state of physical or emotional strain, with a focus on the human form and its capacity for suffering and joy. The use of color is vibrant and varied, contributing to the overall dynamic and somewhat chaotic atmosphere of his paintings. The figures are often depicted in a way that suggests a narrative or a specific moment in time, but the distortion of their features and the expressive brushwork create a sense of ambiguity and emotional depth.
